# WATER UTILITY MANAGEMENT SYSTEM

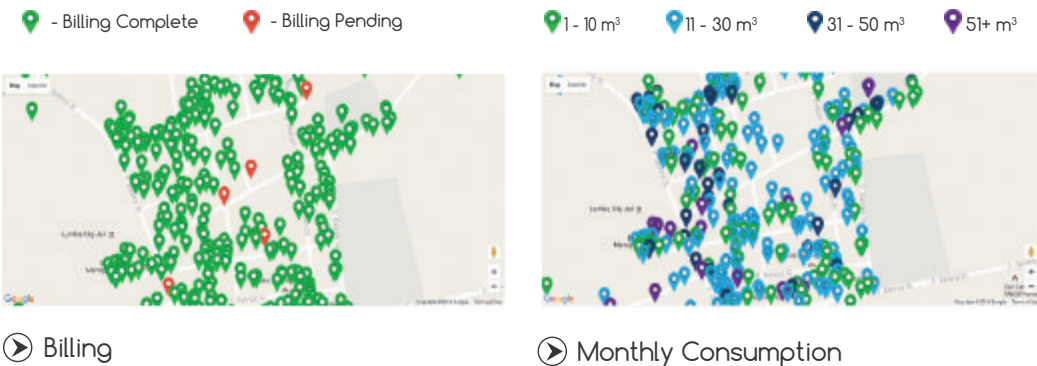

This system is an IT solution that automates the water utility operation and management. Some exciting features:

 <p><b>On-the-Spot Billing (Read and Bill)</b></p> <p>Water bill will be calculated and printed on-the-spot as soon as the meter reader has key-in the reading</p>	 <p><b>Customer Barcode Identification</b></p> <p>Identify each household by scanning the barcode located in the water meter</p>
 <p><b>Customer Location</b></p> <p>Shows the exact location of the customer through Google map</p>	 <p><b>Reader Proximity Validation</b></p> <p>The mobile device checks if the meter reader is near the customer location while taking the reading</p>
 <p><b>View Bills Online</b></p> <p>Bills will be available to view online once generated by the system. Emails are sent to customers to notify them that bills are ready for viewing</p>	 <p><b>Work Order Management</b></p> <p>Engineering team will be able to assign and track tasks, e.g.: new installations, disconnections, repairs, etc.</p>
 <p><b>Intuitive Operation Monitoring Reports</b></p> <p>Monitor business operations by checking various reports generated by our system like Billing Progress Report, Collection Progress Report, Water Consumption Report, and Delinquent Customers</p>	 <p><b>Management Dashboard</b></p> <p>An online analytic business operation reporting to help management monitor and measure business performance, accessible anytime anywhere!</p>
